

NEXT GENERATION SOLUTIONS

Modular Drop-In Solutions Allow for Flexibility and Customization

- Patented wireless technology allows for flexibility and ease of installation.
- Customizable touchscreens in various sizes to accommodate the assortment of switch sizes removed from the aircraft.
- Modular design allows for flexibility for retrofit and forward fit installations.
- Design allows for minimal aircraft wiring and reduced labor costs. (compared to competition)
- Utilizes Additive manufacturing for most parts.
- In development software configuration tool for on wing aircraft changes and design.
