

PLUG. PLAY. DOMINATE.
The Only Map capable of True 4K60.
BY CABIN MANAGEMENT SOLUTIONS

Your passengers deserve more than good—they deserve flawless. EXPLORE delivers true 4K60 output, offering ultra-smooth motion and crystal-clear detail that 4K30 simply can't match. It's not just higher resolution—it's a higher standard in in-flight experience. Software-Driven Upgrade PathEXPLORE is built for scalability.

Easily upgrade your system from SD to HD (1080p) or true 4K60 via simple software activation—no hardware swap required. With USB or Ethernet connectivity and a straightforward turn-on key, EXPLORE keeps your in-flight entertainment future-ready without the downtime.

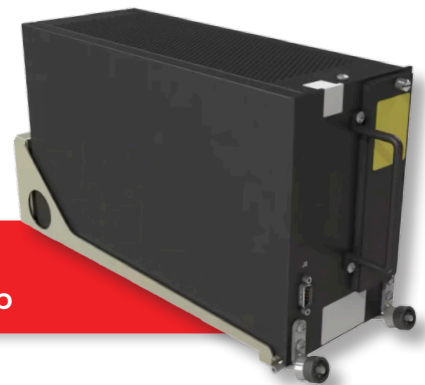

Plug-and-Play Map Replacement Powered by FP3D

Effortless Replacement Compatibility
EXPLORE is a drop-in, pin-for-pin
replacement for legacy systems, including:

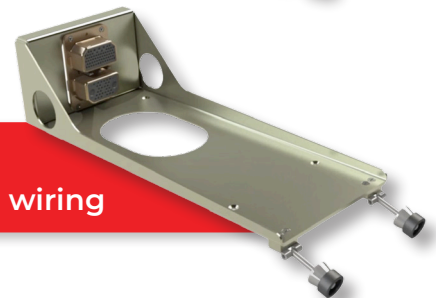

- Honeywell JetMap® II
- Collins Airshow® 400 / 410
- Collins Airshow® 500
- Collins Airshow® 4000
- Collins Airshow® Genesys

Available in flange or tray mount configurations,
EXPLORE installs seamlessly—no rewiring,
no hassle, just a smarter upgrade.

STEP 1:
Remove Outdated Map

STEP 2:
Keep existing tray and wiring

STEP 3:
Plug & Play

Minimize Downtime and Cost

The CMS EXPLORE Moving Map offers an effortless replacement option for most current moving map systems. Equipped with robust hardware, the system is easily upgradeable to accommodate changes in the cabin IFE setup.

Optional PED Integration enables passengers to interact with the map using their own devices, while CMS Evolve switches allow for highly advanced interaction capabilities that, until now, were unavailable in the Business Aviation market.

From legacy to luxury—in minutes.

EXPLORE Tray Adapters make upgrades effortless—engineered for direct compatibility with existing Moving Map trays and wiring. With five precision-fit adapter trays and a dedicated Cabin Briefing Controller for Collins-equipped aircraft, EXPLORE installs fast, clean, and without rewiring. It's retrofit, redefined.
